RE: SEAA 1289: Control Structure Notice for Patterson Ditch, Letter of Compliance

TO: Floyd and Pat:

On December 9, 2008 the State Engineer initiated the referenced agency action and sent you a notice of the statutory requirement to install and maintain a measuring device on the Patterson Ditch associated with your water rights. That notice required the installation of a lockable control device on this diversion.

Since inspection by the Water Commissioner indicates a suitable control structure has been installed and was recently verified by this office, the subject agency action can be formally concluded. We are sending you this letter to document compliance. Your efforts to comply with the order are commended and appreciated.

Steven Gale, the Beaver River Water Commissioner, will control the gate as necessary and lock it when he deems necessary. Please insure that the gate and control mechanism remains operational and in good repair. The clear wood finish used on the gate accentuates the fine wood grain and highlights the excellent craftsmanship of the work accomplished.

Thank you for your cooperation in attending to this matter. If you have any questions concerning this notice please contact me by phone at 801 538-7430.

Sincerely,

Mike Silva  
Distribution Engineer
